

Lipid and Polymer Chemistry

WuXi Chemistry Research Chemistry Services (RCS) Nanomedicine Platform supports your research on synthesis of lipids and polymers and in formulation of small molecule drugs or oligos to form liposomes and lipid nanoparticles (LNPs).

Broad Lipids Capability

Ionizable Lipids

Branched Lipids

Cationic Lipids

Glycerolipids

Sugar Derivatives

PEG Derivatives

Cholesterols

Phospholipids

Thio-Derivatives

Si-Hybrids

Au/Ag-Hybrids

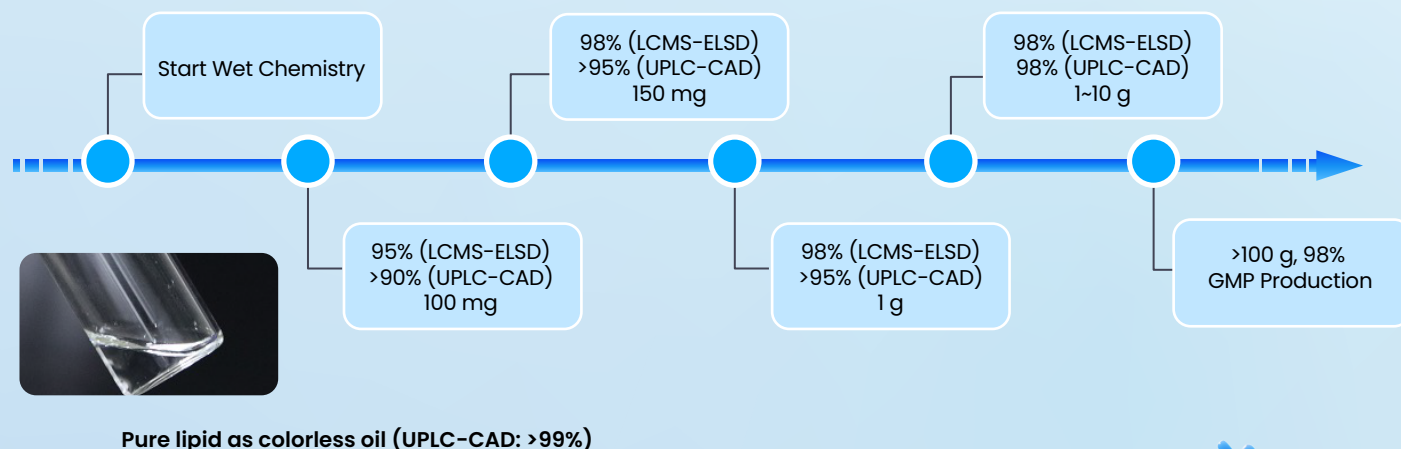

Multi-functional

Note:

✓ The structure is only an example for each type, more lipids are available.

Broad Polymers & LNP Pre-Formulation Capability

Showcase of Nanomedicine Platform

2000+

Delivery

- Rich experience
- More than 6 years' development
- >2000 compounds/year

1000+

Fragment Stock

- Inventory fragment diversification(1000+)
- Scale from g to kg
- 15+ has kg stock
- Matrix enumeration

200+

Chemists

- Veteran Leaders
- Strong specific ability
- Rich experience
- >60% 3 years' experience
- FFS (Fee-for-Service) or FTE (Full-time Equivalent) model

40+

Clients

- US
- EU
- Asia
- Pharma
- BioTech
- NPO etc.

Disclaimer: This flyer is solely for discussion and informational purposes. It does not constitute an offer to provide the compounds/technology mentioned. Any order placed will be subject to a thorough IP risk assessment. We will only accept orders for synthesis services if it is determined that no third-party intellectual property rights are infringed.
